Education

Fordham University, Bronx, NY

Ph.D. in Financial Economics (May 2023)

G.P.A: 3.97/4.0

Valparaiso University, Valparaiso, IN

M.S. in International Economics and Finance

G.P.A: 3.68/4.0

Shanghai University, Shanghai, China

B.S. in Finance

Research Interests

Financial Economics, Applied Econometrics, Machine Learning, Information Fusion, Ensemble Learning, Contract Theory

Working Papers

Equity Ranking with Stochastic Dominance and Combinatorial Fusion

Research Methods: Use information fusion of machine learning models and nonparametric stochastic dominance of four orders to make ranking predictions of U.S. stocks.

Result: The constructed long-only portfolio outperforms the S&P 500 in both cumulative returns (89.5% vs 26.5%) and Sharpe (1.4 vs 0.7) significantly on July 1, 2020 – July 1, 2022.

Multitasking Model with Career Concerns

Research Methods: Extension of the multitasking model in Benabou and Tirole (2016) with career concerns.

Result: The introduction of career concerns into the multitasking model motivates the monopsony employer to raise bonus rates for both high type and low type workers, while it has no impact on the employers in the perfect competition labor market, the low type is properly incentivized, and the high type is over-incentivized.

Model of Strategic Voting: An Extension of Voting Behavior

Research Methods: A simple two-candidate election model of voting under plurality rule.

Result: To maximize a voter's expected utility gain, an agent would misrepresent herself in some certain political issues instead revealing her true positions.

Industry Work Experience

OBEX Securities, New Rochelle, NY

Oct 2017 – Aug 2019

Quantitative Analyst

- Quantitative trading strategy development and maintenance via ensemble learning.
- Kept track of daily balances of accrued interests for equity and fixed income financing and hard to borrow lending, security execution commissions, fixed income custody markup and fees, responsible for monthly settlement.
- Monitored and updated open positions and P&L for proprietary trading via Mark-to-market methodology.
- Assessed the relative market performance of company's quantitative option trading strategy by examining the market and indicator changes and assisted the option and equity trader in daily trading execution, portfolio exposure utilization, and delta risk hedging.
- Improved and updated the introductory brochure of the trading strategy periodically and reallocated the portfolio distribution according to model training results.

- Searched and collected information of related investors to match with public or private companies' needs of fund raising as it pertains to their sale of minority, majority, or entire interests, wrote and improved clients' financing proposals by information collection and due diligence.

Haitong Securities, Headquarter, Shanghai, China

Apr 2012 - Jul 2015

Senior Associate - Bond Financing Department

- Prepared Bond Financing Proposals and tailored customized financing plans to clients' financing needs for debt structure optimization and/or business expansion.
- Due diligence, including clients' business model, financial status, internal management structure, repayment schedule and compliance of operation, collected and sorted out due diligence documents, finally formed due diligence reports with risk assessment.
- Worked on the underwriting, issuing of all kinds of fixed income products including enterprise bond, public and private placement corporate bond, financial bond, mid-term note, commercial paper, and ABS, contacted with investors and submitted the request of issuing to the regulatory agencies (NDRRC, NAFMII, CSRC).
- Distributed all kinds of fixed income products, organized the roadshow online or offline.

Da'gong Global Credit Rating Co., Ltd. Shanghai, China

Jul 2011 - Jan 2012

Credit Analyst

- Due diligence, interviewed with client's financial officer, collected and organized paper materials.
- Data mining and data entry on specific industries, conducted financial analysis.
- Wrote credit rating reports covering all the aspects of clients, such as their ownership structure, financial indicators, market shares and competitors.
- Issued credit ratings with outlook to the clients (AAA, AA+, AA, etc.).
